Name of the coordinator: Dr. Pawan Sharma

Report:

The session started with Mr Rakesh Sharma introducing himself and the topic. Mr. Sharma talked about the significance of decision making skills; how one should be clear-headed when it comes to taking any major decision. The next thing which was talked about was 'Initiating Conversations'. This part is generally left ignored by majority but it's very crucial as it can be an attention seeking point. Be it any group discussion, interview or any meeting, one should try to initiate the conversation by bringing relevant points to the table. Moving forward, the speaker highlighted another interesting fact; which is 'Being Confident'. People generally get nervous while accepting any offer at the interview stage. It's crucial to be aware that nervousness can be harmful in the longer run. It can make or break the deal.

Another point that was discussed in the seminar was; one must have a purpose in life. The purpose must be a journey and not a destination. This helps one to enjoy the journey rather than being anxious about the end result.

The session ended with a QnA round where the speaker addressed relevant questions of attendees regarding the topic of the session.
