

Celebrating 75 years of Independence: Azadi Ka Amrut Mahotsav

On WORLD OZONE DAY

16th September, 2021

Events Organized by

Eco Club-Prakriti, Maitreyi College

The United Nation General Assembly designated September 16 as the World Ozone Day. This international day for the preservation of the Ozone layer is celebrated in commemoration of the date in 1987; the date on which the Montreal Protocol was signed on the substances responsible for the depletion of the Ozone Layer. The ozone layer is a fragile envelop of gas that protects the Earth from the harmful UV rays coming from the Sun. Thus, the Ozone layer helps preserve life on the blue planet, Earth. On this occasion, the Eco Club-Prakriti, Maitreyi College organised an awareness drive on “The Impact of Pandemic on Ozone Recovery”. The pdf file containing a brief discussion of this topic was circulated among the students through virtual mode. Apart from this, a poster making competition was organized on the theme, “Save Ozone Save Life” for the students of different colleges across the country. Total 74 e-posters were received (e-mail id: prakriti@maitreyi.du.ac.in), which went for preliminary screening by the members of Eco Club. The final screening of the e-posters was done by Dr. Ritu Dhingra (Department of Physics) and Dr. Monika Heikrujam (Department of Botany). The winners of the poster making competition was intimated through e-mail. The winners are as follows

FIRST POSITION:

Name: Ms. Riyanshi joshi
B.Sc.(H) Botany, 3rd year
Gargi College, University of Delhi

SECOND POSITION:

Name: Ms. Thingujam Jeena
B.Sc.(H) Botany, 3rd year
Maitreyi College, University of Delhi

THIRD POSITION:

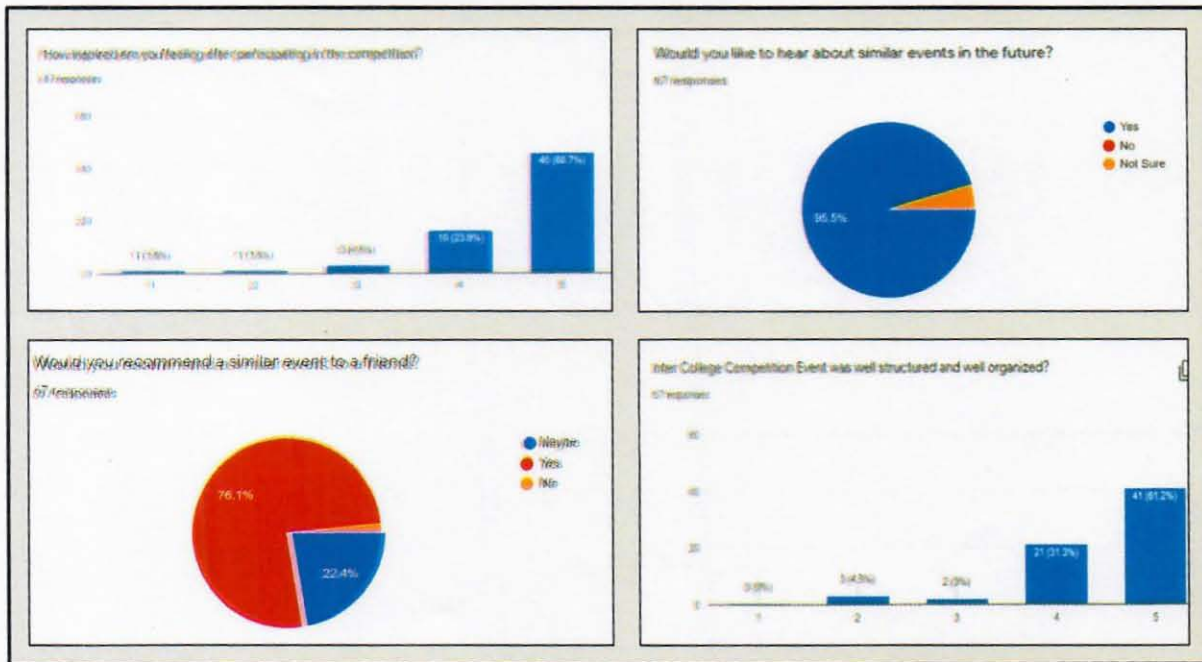

Name: Ms. Kanishka Chaudhary
B.Sc.(H) Botany, 2nd year
Swami Shraddhanand College, University of Delhi

Feedback of the Event

Google form was circulated to collect the feedback of the event. Total 67 responses were received and evaluated to design the feedback analysis report. The students of different Universities, across the country participated in the poster making competition. Majority of the

participants felt that the theme of the competition inspired them in various ways. Almost all participants expressed their willingness to participate in similar events in future. They agreed that the event was well structured and well organized. Many participants expressed their support for such type of awareness programs and suggested that this type of events should be organized frequently.

WORLD OZONE DAY

September 16, 2021

THEME: SAVE OZONE SAVE LIFE

RULES OF THE COMPETITION:

1. Open for all undergraduate students.
2. Only one entry per candidate allowed.
3. Poster should be Original and hand drawn in A3 size format.
4. Entries should be mailed to prakriti@maitreyi.du.ac.in by 16th September, 2021 till 5pm.
5. Participation certificates and results will be sent to all the participants via email.

Event: National Webinar titled “Conservation of Biodiversity”

Date: Friday, March 4, 2022

Name of organizing society: Eco-club Prakriti

Name of convener: Dr. P. Kavita

Speaker: Dr. Nitesh Joshi, Associate Professor, Rizvi College of Arts, Science and Commerce

Number of the participants/beneficiaries: 85

Report: The National webinar commenced with a warm opening by Dr. P Kavita, who invited Dr. Prajwalit Sikha to begin the event. This was followed by lamp-lightening ceremony. Dr. Prajwalit Sikha introduced the speaker, Dr. Nitesh Joshi to the audience. Dr. Joshi started his talk with a revolting example of Noah’s Ark in lieu of conservation of biodiversity around the globe and in Madagascar Islands. His talk revolved about conservation of biodiversity, and the existing global awareness surrounding it. Dr. Nitesh proceeded further talking about the significance and value of conserving our biodiversity. The spectacular talk included global diversity estimates of the plant species that needed conserving. The listings were extremely informative as well as eye-opening. He spoke about the importance of endemic species found in India, the world heritage sites, biosphere reserves, wetlands, crop species (167) and their relatives in conservation of biodiversity. He demonstrated the global endemic species beautifully by a generous display of images via slide show. His talk also included food biodiversity, it’s benefits and applications in agriculture. His lecture mentioned how biodiversity can be saved via biodiversity-protected area, intercropping, growing trees on farms, switching to organic compost and so on. Following, he talked about methods and strategies of conserving biodiversity (habitat conservation, species preservation, introduction of exotic species, predation control, legislative control). Further, in-situ conservation strategies were discussed (sacred grooves, sacred species, Protected Area Network; PAN, scientific reserve: national park, wild life sanctuary, protected landscape/seascape, resource reserve, managed resource area, biosphere reserve, world heritage site, farm conservation). Additionally, ex-situ conservation strategies were also discussed for biodiversity conservation, such as germplasm collections, botanical gardens, IBPGR, gene banks and seed banks inclusive of steps like field collection, record maintenance, listing, plant tissue culture, herbarium preparation.

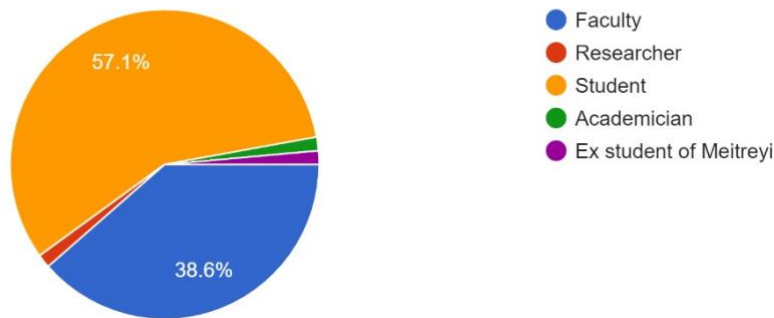

He concluded his talk by putting light on the direct yet often over-looked association between conservation of biodiversity and sustainable development.

The question-answer (Q-A) round was mediated by Dr. Prajwalit Shikha and answered to great detail by Dr. Nitesh Joshi.

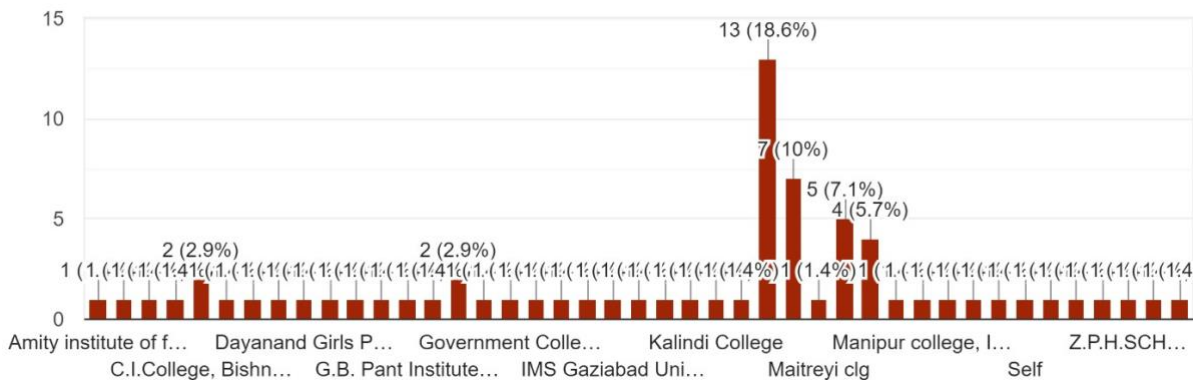

The session was concluded with a vote of thanks to Dr. Nitesh Joshi, Dr. P. Kavita (Convener), Members of Eco club- prakriti and all the participants.
